

Report on Race to the Top Funds

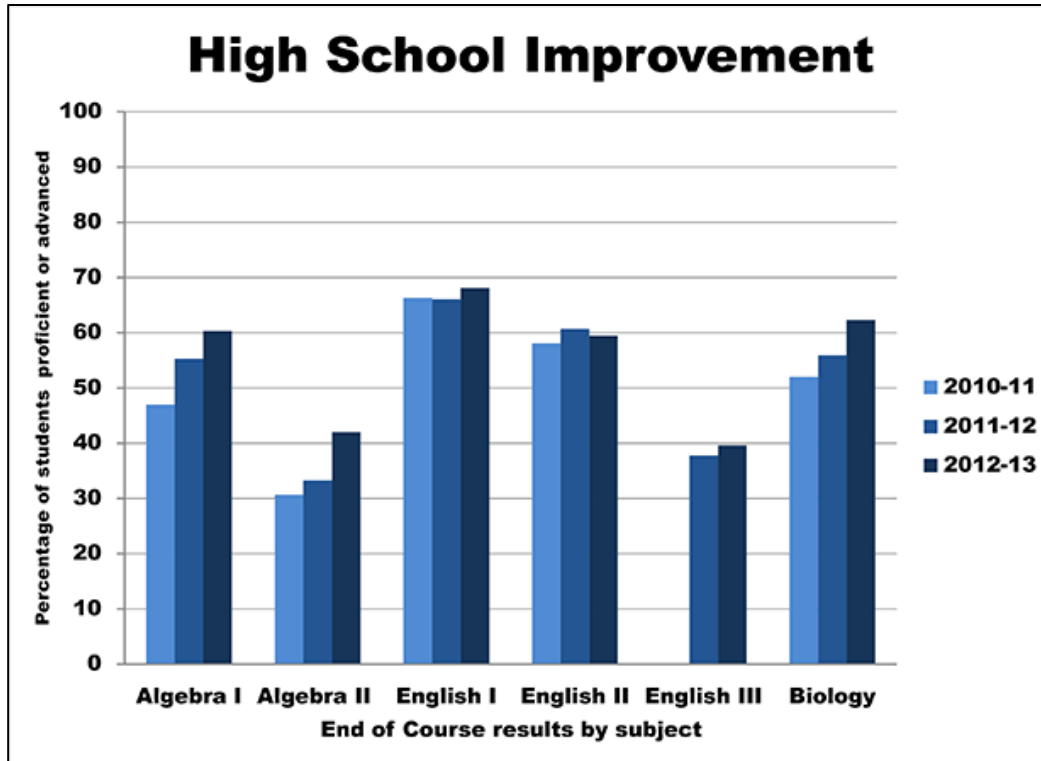

This report is submitted to the General Assembly per Tennessee Code Annotated § 49-1-616, with the purpose of detailing the amount of Race to the Top funds awarded to districts through grants. The report includes a brief overview of Race to the Top activities, descriptions of district grants, and a table of grants by district. Additional information may be found on the department's website (<http://www.tn.gov/education/about/fttt.shtml>) or at the U.S. Department of Education's website (<http://www2.ed.gov/programs/racetothetop/index.html>).

Overview of Race to the Top: 2012-13

Tennessee's application for Race to the Top articulated a compelling vision for education in Tennessee. This vision brought together all districts from across the state and created policy conditions favorable to executing against this plan. Reaching the ambitious goals set in the plan dramatically changes the trajectory of our education system in the state and will make Tennessee the national leader in student achievement growth. By 2015, Tennessee seeks to be the fastest improving state in the nation, as measured by NAEP and ACT assessments, and is committed to continuing to close achievement gaps as we grow overall student achievement.

Tennessee's Race to the Top plan is a foundational component of our strategy to achieve the ambitious goals we have set, and its initiatives have become an integral part of the priorities of each division within the department of education. We have undertaken a significant reorganization of the agency to ensure that our human resources align with our top priorities, and have worked closely with district leaders to ensure that we are providing meaningful support as they undertake these bold reforms. As we have been executing against this ambitious plan, we have seen continued improvement in student outcomes.

These gains mean that nearly 91,000 additional students are at or above grade level in math, and nearly 52,000 additional students are at or above grade level in all science, as compared to 2010. In addition to the gains made on the Tennessee Comprehensive Assessment Program (TCAP), 2012-13 marked the first year that students in Tennessee performed above the national norm on EXPLORE and PLAN results, marking substantial growth over prior years and serving as an indicator of the progress we hope to see on ACT results in the coming years.

At the same time that we have been implementing significant changes in our education system and seeing student outcomes rise, educators are also growing more positive over time about their work, as measured by the Teaching, Empowering, Leading, and Learning (TELL) Survey administered through the state's Race to the Top grant. Tennessee educators responded more positively in 2013 than they did in 2011 to questions across all constructs of the survey. Of note, approximately 85 percent of educators indicated that they are recognized as educational experts and are trusted to make sound professional decisions.

The 2012-13 school year marked Tennessee's third year of Race to the Top implementation. During this year, the department focused on several key priorities for implementation and made significant progress against these priorities, including supporting schools and districts in transitioning to the new state standards, improving implementation of teacher and administrator evaluation, launching the Achievement School District, and restructuring regional offices to provide academic oriented support to districts.

The information below provides an overview of how funds were administered to districts, both through the direct LEA portion of the grant as well as additional competitive grants administered by the department.

Race to the Top Funding

The state of Tennessee was awarded approximately \$500 million through the Race to the Top grant, 50 percent of which flowed directly to districts (**LEA Fund**). These funds were allocated to districts by law based on their Title 1 funding allocation. Annually, districts created a scope of work to document their plans for spending the funds which were then reviewed and approved by the state.

The other 50 percent of the funds were retained at the state level to execute a variety of initiatives as outlined in the state's application. Within these initiatives, many included competitive grants to districts to execute innovative efforts to bolster educational outcomes. The list below offers brief overviews of the competitive grants awarded to districts from the state's half of the funds.

- **Supplemental Scope of Work Fund (Supplemental):** The department made available \$8 million in supplemental funding to be awarded to districts that agreed to implement specific initiatives that advance the core purpose of the state's First to the Top plan including efforts across evaluation, high-quality standards, and strategic student assignment. The Supplemental Scope of Work Fund was optional to districts, and for those opting to participate, the \$8 million was awarded per the Title 1 funding allocation formula. Districts use the supplemental funding to support their LEA Scopes of Work activities in addition to the LEA Fund.
- **Common Core State Standards ELA Pilot Grant (ELA Pilot):** In 2012, the department supported districts interested in piloting the Common Core State Standards for ELA. Districts choosing to participate in the pilot appointed district teams to participate in state wide meetings to share lessons learned; implemented four practice writing assessments; had all teachers complete a state-developed online module; and aligned instructional materials for literature and reading and implemented at least one model unit district-wide.
- **Competitive Supplemental Fund (CSF):** The Competitive Supplemental Fund competitively distributed \$1.5 million over four years to the 20 percent of LEAs receiving the smallest share of formula funds through Race to the Top's LEA Fund. The eligible LEAs applied to use these funds for three purposes: to develop alternative compensation plans, to develop job-embedded professional development plans linked to educator evaluation, and to turn around low performing schools, in order to increase educator effectiveness and student achievement in their districts.
- **Focus Schools Grant (Focus):** This project provided competitive grants to Tennessee's Focus Schools to implement researched-based tools and strategies to focus on closing achievement gaps. Schools not receiving a grant are assigned an academic specialist who works with the school to implement initiatives aimed at closing achievement gaps.
- **Innovation Acceleration Fund (IAF):** The Innovation Acceleration Fund is a competitive grant for districts to develop and implement performance-based compensation plans. Districts receiving the competitive grant are expected to develop and implement a performance-based compensation system that encourages and rewards educators for contribution to student learning, evidence of professional skill, ongoing professional learning, contribution to ongoing school development, and evidence of professional leadership.
- **Teacher and Leader Residency Programs (Residency):** The Teacher and Leader Residency Program offers a competitive grant project for interested LEAs to develop and/or expand teacher and principal residency programs. Teacher and principal residency programs are need-based and designed to fit a variety of purposes, including pre-service recruitment and preparation. Grants could also be awarded for residency programs that provide advanced training/focused professional development, or programs that utilize proven veteran professionals as exemplars/mentors. Through this initiative, the state awarded four-year grants to four residency programs.

- **Renewal Schools Grant (Renewal):** This project provided Tennessee’s Renewal Schools (Corrective Action and Restructuring I) targeted technical assistance and researched-based tools to improve student achievement and move the schools to high performing levels for all students.
- **Reward Schools Grant (Reward):** Through Race to the Top, Tennessee created a Reward School Ambassador Program. Ambassadors are highly effective teachers from the state’s top schools. They were nominated by their schools and selected for this year-long, paid position through a competitive application and interview process. Through this program, the state aims to leverage the talent of our top teachers, spark the development of robust partnerships between schools, and spread best practices. The state identified a cohort of 15 Reward Ambassadors.
- **Leadership TNLEAD (TNLEAD):** The TNLEAD innovation grants fund partnerships that develop or replicate innovative and high-impact leadership programs aimed at producing positive outcomes for educators and students. Grants can focus on either leadership development or enhancing practices for identifying promising leaders, giving districts a unique opportunity to study, share, and ultimately scale up new and successful leadership models.
- **Portfolio Implementation Grant (Portfolio):** After the State Board of Education approved the portfolio model as a growth measure in Fine Arts, the department offered a grant to districts interested in implementing the portfolio model in 2012. The grant covered the subscription to the portfolio system, an evidence collection tool of student progress and growth. Additional districts participated in the portfolio model, but were able to cover the expenses from other funding sources.
- **Teacher Leader Council (TLC):** The Teacher Leader Council was created to develop adaptable teacher leadership models for implementation in districts across the state by pulling together highly effective district leadership teams representing the geographic, socioeconomic, and demographic diversity of all three grand divisions of the state. The six districts selected to serve on the Council created different, innovative teacher leader models aligned to their specific strategic plans and reflecting the educator professional learning needs most closely tied to increasing student achievement and growth.
- **Innovative Education Network (IEN):** Building from an analysis of the available technology across the state and districts’ interests and concerns in technology, the department launched the Innovative Educator Network as a cohort experience of fifty highly-effective educators to delve into the development and implementation of personalized learning strategies. The cohort’s objectives are to ensure technology is used wisely in schools to promote technology fluency and maximize strong instruction, to promote personalized learning efforts that draw on educator skills and technology to tailor educational experiences, and to learn, develop, and share successful models of technology integration and personalized learning with schools and districts across the state.
